PROFESSIONAL SUMMARY

DevOps Engineer and Engineering Manager with 4.5+ years designing, migrating, and operating cloud-native infrastructure on AWS and Azure. Reduced cloud spend by 40% via Terraform right-sizing at CareerLabs; cut EC2 costs 30–40% via Spot Instances. Led EC2-to-EKS migration, full AWS-to-Azure AKS migration, linux/amd64 to arm64 Graviton transition, and CI/CD optimisations cutting build times by ~50%. Maintained 99.99% uptime monitored via UptimeKuma with Telegram alerting. AWS SAA, KCNA, Terraform, and Azure certified.

TECHNICAL SKILLS

Cloud	AWS (EC2, EKS, S3, SQS, SES, CloudFront, IAM, Cost Explorer, Budgets, EventBridge, Lambda) · Azure (AKS, CDN Front Door, Container Registry, Storage, Azure SQL)
IaC & Automation	Terraform · eksctl · Helm · Bash · AWS SDK
Containers & Orchestration	Docker · Kubernetes (EKS, AKS) · HPA · Node Autoscaling · Spot Instances · Nginx Ingress · Multi-arch builds (amd64 + arm64 / Graviton)
CI/CD	Jenkins · GitHub Actions · Docker layer caching · Azure DevOps
Monitoring and Observability	AWS CloudWatch · AWS CloudTrail · Sentry · Prometheus · Grafana · Uptime monitoring · Google Chat / Telegram alerting
Programming	Node.js · Express.js · REST APIs · Shell scripting · Next.js · Vue.js
Networking & Security	AWS IAM (least-privilege) · VPC · Security Groups · S3 bucket policies · Azure VNet · NSGs · SSL/TLS · AWS Certificate Manager
Databases	PostgreSQL · MongoDB · MySQL · AWS RDS · Azure SQL

PROFESSIONAL EXPERIENCE

Assistant Engineering Manager · [Confiance Bizsol Pvt Ltd](#)

Apr 2025 – Present

Ahmedabad, India · On-site

Leading the team of engineers, establishing cloud-native architecture standards, driving IaC adoption, and ensuring production reliability across all services.

- ▶ Overseeing infrastructure strategy for the company's growing SaaS suite all deployed on AWS with containerised workloads.
- ▶ Introduced IaC-first deployment standards using eksctl, reducing environment provisioning time.
- ▶ Conducting structured code and infrastructure reviews, mentoring engineers on Kubernetes, Docker, and AWS best practices.

Software Development Engineer L2 · [Confiance Bizsol Pvt Ltd](#)

Jul 2023 – Apr 2025

Ahmedabad, India · On-site

- ▶ Led **EC2-to-EKS migration** using eksctl (IaC), replacing manual deployments with repeatable, horizontally scalable cluster provisioning across all environments.
- ▶ Provisioned isolated EKS clusters per environment with resource quotas, security boundaries, namespace RBAC, and **AWS Budget/Billing alerts** for proactive cost governance.
- ▶ Reduced costs on lower-priority clusters by **30–40%** through strategic use of **EC2 Spot Instances** for worker node groups, with fallback to on-demand for critical workloads.
- ▶ Secured storage buckets with least-privilege IAM policies and accelerated static asset delivery using **CDN** with optimised caching and origin shield configuration.
- ▶ Containerised and deployed Node.js microservices on EKS, achieving **100% uptime** since launch.

Software Development Engineer III · CareerLabs Technologies Pvt. Ltd

Dec 2022 – Jul 2023

Remote

- ▶ Engineered cost-optimised AWS infrastructure via **Terraform**, achieving **40% reduction in cloud spend** through right-sizing, reserved capacity planning, and Spot usage.
- ▶ Optimised **Jenkins CI/CD pipelines** with Docker layer caching, cutting build times by **~50%** and accelerating release cadence across all services.
- ▶ Migrated the production and development environments from linux/amd64 to arm64 arch to utilise AWS's latest graviton series servers.
- ▶ Integrated real-time production monitoring and alerting (Google Chat, Telegram) - significantly reducing Mean Time to Resolution (MTTR) for production incidents.
- ▶ Spearheaded full **AWS-to-Azure AKS migration** - workloads, databases, and container registries - with zero downtime; configured Nginx Ingress, Azure CDN Front Door, and Azure Storage for the delivery layer.
- ▶ Designed scalable Node.js microservices for CPaaS/SaaS integrations (VerLoop, WhatsApp Business API), optimised for horizontal scalability and fault tolerance on Kubernetes.

Software Development Engineer II · CareerLabs Technologies Pvt. Ltd

Dec 2021 – Dec 2022

Bengaluru, India · On-site

- ▶ Established Docker-based containerisation pipeline across all services, enforcing environment parity between dev, staging, and production deployments.
- ▶ Designed and implemented a high-throughput URL shortener backend (Express + PostgreSQL + MongoDB), serving hundreds of thousands of redirects for marketing, HR, and sales.
- ▶ Built an in-house WhatsApp Marketing Platform integrating WhatsApp Business Cloud API with **AWS SQS** for async message queuing, replacing a third-party tool and saving **~₹70,000/quarter**.

PROJECTS [All Projects](#)

[K8Lens](#)

H1 2026

Next.js · @kubernetes/client-node · Docker (Alpine) · multi-arch (amd64 + arm64) · Kubernetes RBAC.

- ▶ Zero-config Kubernetes dashboard; supports kubeconfig and URL + bearer token auth out of the box.
- ▶ Designed a **0–100 cluster health-scoring algorithm** evaluating node health, pod status, workload conditions, events, and config quality with per-category deduction breakdowns.
- ▶ Real-time monitoring across 15+ resource types (pods, services, ingresses, PVCs, RBAC) using Next.js server actions; multi-arch support (linux/amd64 + arm64).

[Traefik Dashboard](#)

Q4 2025

Next.js · React 19 · Tailwind CSS v4 · shadcn/ui · Zustand · Docker

- ▶ Read-only Traefik reverse proxy dashboard; connects to any Traefik API endpoint (local or remote) with configurable persistent endpoint storage.
- ▶ Built Next.js API route proxy layer to avoid exposing Traefik API directly to the browser - no CORS issues, endpoint config stays server-side.
- ▶ Automatic version checking against GitHub releases with dismissible alerts; smart error handling with auto-recovery when connection is restored.

AWS to Azure Migration - CareerLabs (2023)

Q1 2023

AWS (EC2, RDS, ECR) · Azure (AKS, SQL, CDN Front Door, Container Registry) · Terraform · Jenkins · Nginx Ingress

- ▶ Technical lead for full infrastructure migration from AWS to Azure AKS - evaluated AKS as migration target and designed the complete cut-over plan.
- ▶ Migrated Docker Compose workloads to **AKS with HPA and Node Autoscaling**; executed zero-downtime database and container registry migration to Azure.
- ▶ Configured Nginx Ingress, Azure CDN Front Door, and Azure Storage; set up **Azure DevOps within AKS** for automated, repeatable post-migration deployments.

EDUCATION

Bachelor of Engineering - Computer Engineering

Pimpri Chinchwad College of Engineering, University of Pune

Sep 2016 – Oct 2020

CERTIFICATIONS [Credly Link](#)

KCNA: Kubernetes and Cloud Native Associate · Linux Foundation	2024
Microsoft Certified: Azure Fundamentals · Microsoft	2023
AWS Certified Solutions Architect – Associate · Amazon Web Services	2023
HashiCorp Certified: Terraform Associate (003) · HashiCorp	2023
